

Allosaurus

Theropod

Length: 12 metres
Diet: Carnivorous
Continent: Europe
Lived: 152 million years ago

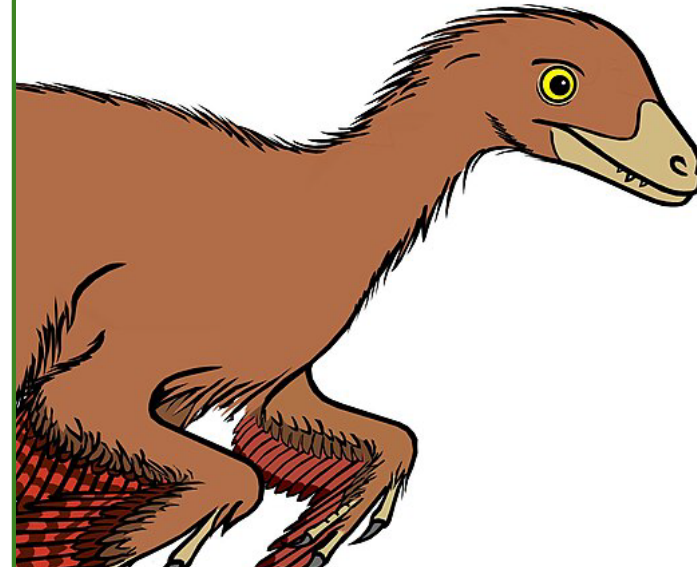

Archaeoceratops

Ceratopsian

Length: 1.3 metres
Diet: Herbivorous
Continent: Asia
Lived: 121 million years ago

Bambiraptor

Theropod

Length: 1 metre
Diet: Carnivorous
Continent: North America
Lived: 84 million years ago

Brachiosaurus

Sauropod

Length: 30 metres
Diet: Herbivorous
Continent: North America
Lived: 155 million years ago

Chindesaurus

Early dinosaur

Length: 4 metres
Diet: Carnivorous
Continent: North America
Lived: 227 million years ago

Concavenator

Theropod

Length: 6 metres
Diet: Carnivorous
Continent: Europe
Lived: 130 million years ago

Diplodocus

Sauropod

Length: 26 metres
Diet: Herbivorous
Continent: North America
Lived: 152 million years ago

Herrerasaurus

Early dinosaur

Length: 3 metres
Diet: Carnivorous
Continent: South America
Lived: 228 million years ago

Maiasaura

Ornithopod

Length: 9 metres
Diet: Herbivorous
Continent: North America
Lived: 80 million years ago

Parksosaurus

Ornithopod

Length: 3 metres
Diet: Herbivorous
Continent: North America
Lived: 76 million years ago

Zephyrosaurus

Ornithopod

Length: 1.8 metres
Diet: Herbivorous
Continent: North America
Lived: 120 million years ago
